

The Multiplier Event in Lithuania took place 27th of August from 15:00 CET to 19:00 CET, 2021 in the conference hall of the “Miesto Sodas” in Kaunas city centre. The event was attended by 40 participants, most of them VET providers, trainers and representatives of educational institutions, ICT business owners and people interested in enterprises in ICT sector.

Overall, the event was a success. Participants highlighted the presentation of m-learning platform as the most interesting part of the Multiplier event. The introduction on how to navigate in the platform and the opportunity to try the programme immediately received the most positive feedback. The responses indicated that the developed training materials, the m-learning tool together with the interactive exercises, could be used in the future.
