

## Multiplier Event in Poland\_2

On 23<sup>rd</sup> September 2021 Danmar Computers organised an Multiplier Event disseminating the project **SAVE - Stimulating And Validating digital Entrepreneurship as the best way to increasing the quality of start-ups**. The event was an opportunity to present the results of the project and spread knowledge in the field of Industry 4.0 and new technologies, as well as current economic phenomena interesting from the perspective of the target group.

The meeting took place in the Dr. Jan Zwierz School Complex in Ropczyce (Poland) and was attended by 40 people from the target group of the project.

The meeting was part of events taking place in the partner countries to promote the project, its results and topics to local target groups.
