SAVE valuable time with SAVE Start-Ups project!

What have the project partners achieved so far?

Developed m-learning course

The SAVE Start-Ups project team has developed the training course for start-uppers and young entrepreneurs comprising from 7 interactive modules on such topics: Digital start-ups vs Digital scale-ups, Circular economy in your start-up, Digital Lifestyle entrepreneurship, Internet of Thing in entrepreneurial practice, Infrastructures of sensors in daily business usage, Analytics algorithms for customers Big Data, Cybersecurity in your start-up.

To ensure the best quality of the developed m-learning course, the partners cross-checked each module and made corrections.

In this m-learning you will learn about these 7 topics:

1 – Digital start-ups' vs 'Digital scale-ups

2 – Circular economy in your start-up

3 – Digital Lifestyle entrepreneurship

4 – Internet of Things in entrepreneurial practice

5 – Infrastructures of sensors in daily business usage

6 – Analytics algorithms for customers Big Data

7– Cybersecurity in your start-up led

Created multimedia presentations

SAVE Start-Ups partnership created multimedia presentations of each module to present key information of the developed material, including key statistics and importance of each topic.

On 19 February, the project team met online to share the modules they had developed with partners and to deepen their knowledge of the training material. During this meeting the pilot phase and next steps were discussed.

Prepared interactive exercises

To make the modules as interactive and engaging as possible for start-uppers and young entrepreneurs, partners have created interactive exercises to their modules.

After going through the theory part, start-uppers will be invited to use the practice part which is composed of 12 digital exercises that are prepared in the form of interactive questions with custom feedback in each module. Important thing to mention is that not only the correct is explained, but also each wrong answer have relevant commentary explaining why the selected option was not the correct one. In this way the learniers can further strengthen their skills in each topic.
