

The multiplier event has been organised by Technical University of Košice at the premises of Prešov University in Prešov on September 21, 2021. The participants were students of the last year (2nd year Master level) at the Faculty of management and Faculty of production technologies -both faculties at University of Prešov. This selection reflected two different groups which are expected to start own business or already started some activities in the field of entrepreneurship (mostly students from production technologies filed). Also the future trainers attended event. Altogether 154 persons attended event which was held online and also offline.

The discussion revealed that participants are interested in course. They were pleased by fact that participants can choose only those modules which are relevant for him/her. The participants declared that they got the possibility to increase their knowledge which represent the high added value for them. The majority expect to utilise the course in the future.
